PROFILE SUMMARY

I would like to turn out to be software professional where, I can work as a team member and to secure a position where I can efficiently contribute my skills and abilities to the growth of the organisation and make my professional career.

INTERNSHIPS

CodeSpeedy Technology Private Limited, 30 Days

The CRUD Operation project is a Java-based application using Hibernate, Spring Boot, Maven, JSP, and Servlets. It enables basic Create, Read, Update, and Delete operations for managing data efficiently.

PROJECTS

Cryptocurrency price prediction (Final Year Project), 90 Days

This program helps in forecasting cryptocurrency prices. In an effort to more accurately predict bitcoin prices quantitatively. It involves training a machine learning model to predict future prices of bitcoin based on historical data. It requires skills in data analysis, machine learning, and programming, and demonstrates expertise in these areas.

BMI Calculator, 61 Days

Using java and Android studio. BMI Calculator gives out the BMI (Body Mass Index) value and categories the BMI based on provided information from WHO and CDC for both children and adults.

Agriculture Crop Management System (ACMS), 28 Days

Using HTML, CSS, PHP, MySQL, DBMS and JS. The main aim of developing ACMS application is to help farmer by providing all kinds of agriculture related information through the site. ACMS project is web application which helps farmer to share best practice farming process and experience.
